

BED BATH & BEYOND®

Bed Bath and Beyond is an awesome store from which you can get all your home-goods. You'll surely find yourself there when shopping for your college dorm room.

One of the biggest appeals with this store is their acceptance of coupons. You can use multiple of the shown coupons per purchase. Each coupon will take 20% off of one single item. So if you have 5 coupons and 5 items, you will receive 20% off of each item purchased. If you do not have enough coupons, you will only receive 20% off of as many items as you have coupons for.

The first coupon is taken off of the highest priced item. The second coupon is taken off of the second highest priced item. Etc...etc...

On the right is your receipt from the Bed Bath and Beyond.

The machine isn't working correctly and your cashier had a terrible math teacher, unlike you.

1) Apply the shown coupons to your purchase.

You only have as many coupons as are shown.

2) Calculate your subtotal

3) Calculate sales-tax. In NJ, there is 7% sales tax that is applied to your subtotal.

Tax does not apply to clothes and food only.

4) Calculate your total
